EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 11, page 14, line 20, "a second transistor in the first differential pair" has been changed to -- a second transistor in the second differential pair --.

The following is an examiner's statement of reasons for allowance: prior art does not teach nor render obvious a linear interpolator for interpolating a first input voltage V_{in1} and a second input voltage V_{in2} according to a factor r that has, in combination with other limitations, a second differential pair of transistors adapted to split a current proportional to V_{in2} such that a first transistor in the second differential pair conducts a differential current proportional to $(1-r)*V_{in2}$ and a second transistor in the second differential pair conducts a differential current proportional to $r*V_{in2}$; nor does it have a second differential pair adapted to split a differential current proportional to $(1-r)^2$ such that a first transistor in the second differential pair conducts a differential current proportional to $V_{in2}*(1-r)$ and a second transistor in the second differential pair conducts a differential current proportional to $-V_{in2}*(1-r)$.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
